

**Engine won't start?**

- Giggle the shifter to find neutral.
- Check that the kill switch lanyard is in place.
- If it wont start. Set the anchor so you don't drift and then call us.

**Run Aground?** Turn motor off and jilt up. Push boat into deeper water. You may have to get out of boat and push. Tilt the engine back down and restart.

**Lost?** Check the chart and compare navigation Markers and note the numbers. They are posted on the chart. Ask passing or nearby boaters for directions. Anchor and Call us if you are still ket.
